DETAILED ACTION

Specification

The abstract of the disclosure is objected to because line 2, “comprises” should read - includes-.

Correction is required. See MPEP § 608.01(b).

Claim Objections

Claim 10 is objected to because of the following informalities:

Referring to claim 10, line 1-2, “wherein the method is applicable to hardware, software and firmware”, it is not clearly pointing how the method is applicable to hardware, software and firmware.

Appropriate correction is required.

Allowable Subject Matter

Claims 1-9 and 11-12 are allowed.

Claims 1-4, 7, and 11-12 are allowable over the prior art of record, none of the prior art whether together singularly or in combination to teach the claimed combination as recited. The closest reference No. 6,760,649 does not disclose or suggest the improvement of the instant application comprising a detection unit for detecting and acquiring an operation status data of the component arranged inside the computer and a regulation unit capable of issuing a first control signal to a processor for requesting the operation status of the component arranged inside the computer to be regulated, wherein the processor regulates the component inside the computer by issuing a second control signal through an Inter Integrated Circuit and wherein the regulation unit is arranged on a display panel, and a third control signal to the processor for setting a critical

Art Unit: 2863

range of data to generate an audio and visual alert signal if the data had exceeded the critical range.

The reason for allowance of the claims 5 and 8 is the inclusion of the component arranged inside the computer is a video graphic adapter (VGA) card comprising a graphic processing unit (GPU), a fan, and a memory having data of rotation speed of the fan, a working voltage and a working frequency of the memory, a temperature, a working voltage and working frequency of the GPU.

The reason for allowance of the claims 6 and 9 is the inclusion of the component arranged inside the computer is a TV tuner card including a TV channel and FM channel.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
